British racing green / Matstone

WLC: Satin chrome plated steel / Elegance dark brown leather
WCT: Satin chrome plated steel / Walnut tabletop

LEATHER

The Wire Collection uses mostly vegetable-tanned full-grain cowhide leather. Vegetable tanning is the most natural and traditional method of tanning, where vegetable tannins are used to create a thick and supple leather with rich colors.

Our leathers are aniline dyed, a process that retains the hide's natural texture and allows the surface to take on a beautiful patina over time.

ELEGANCE

Type: Elegance is an aniline leather. It is at the top of the range of deluxe, high-end leathers.

Tanning and Coloring: Tanned with chrome followed by a vegetable tanning process to enhance the firmness. Water-based aniline dye.

Origin: The finest european raw cowhide from cattle grazed on the Alpine meadows spanning Switzerland, Germany, Austria, Liechtenstein, and Germany.

Attributes: The ultimate in classic elegance. Boasting a natural patina that appears over time depending on the light, conditions and usage.

YELLOWSTONE

Type: Yellowstone is a vegetable-tanned aniline leather. It has incomparable depth and a magnificent, naturally-worn look due to a pull-up effect.

Tanning and Coloring: Tanned with extracts from the fallen fruit of Tara trees in Peru. The dye is aniline and water-based.

Origin: The finest european raw cowhide from cattle grazed on the Alpine meadows spanning Switzerland, Germany, Austria, Liechtenstein, and Germany.

Attributes: Robust with visible natural markings and a slightly worn look. Yellowstone has been awarded the ECARF Seal of Quality, certifying it as an allergy-friendly product, by fulfilling strict quality requirements by the European Centre for Allergy Research Foundation.

NOTE: Yellowstone is a natural leather that boasts textures and markings (insect bites, scars, etc.) that are reminiscent of its natural origins. These details are to be expected and contribute to the distinctive beauty of Yellowstone, making each piece completely unique.
