SHADE BIN

With its clean and distinct silhouette, Thomas Bentzen's geometric Shade Bin combines utility with elegance. Made in durable polypropylene, the bin has a matching, removable lid, and is available in a range of colours that enables it to blend into its environment or to stand out.

Although designed for use as a waste bin, the Shade Bin is extremely versatile, and can be used for a multitude of uses in domestic, professional, or public environments.

THOMAS BENTZEN

Thomas Bentzen is a Danish designer who founded his own studio in Copenhagen in 2010. Previously, he was a partner at Studio Louise Campbell, where he worked for five years. He is a board member of the Danish Cabinetmakers Autumn Exhibition (SE) and an occasional teacher at the Royal Danish Academy of Fine Arts, School of Design.

Bentzen is a methodical designer, who seeks to create fine-tuned products that are both engaging and durable. He works in the classic tradition of Scandinavian design – with a pragmatic, unassuming and universal outlook. Against this backdrop, he has shown a talent for creating designs that are imbued with a contemporary feel that spark a sense of joy too. For HAY, Bentzen has designed the DLM Table and Shade Bin.

DESIGNED BY THOMAS BENTZEN

“The Shade Bin’s geometric planes were simply a result of the manual design process. You might call it a happy accident that results from actually using your hands, and not a computer, to make a model.”

“I was making paper models for the bin, and found it difficult to create a round shape, so I made some cutting lines that I ended loving visually. Then I realised that they made the bin stronger. And I noticed that some super nice things were happening with its shadow.”

“I wanted to add the handles to show the use, to indicate that here is a removable lid: it’s a suggestion, it’s a hint. If a thing has a function, then people should know about it.”

— Thomas Bentzen

“A paper bin is something I’ve wanted to do for a long time, but was just waiting for the right design. It’s one of these products that people really need. I was looking for a paper bin that would stand out, and still blend in. Doing designs that have this dual nature is a challenge, because it needs to have a little detail that makes it different from others.”

— Mette Hay
